

Danish Saber

As a professional Software developer, I am adept at creating large-scale single-page applications and landing websites using **Vue.js, (as well as other frontend frameworks), JavaScript and Typescript.**

Over the course of 5+ years, I have honed my expertise in web technologies, leveraging my skills in JavaScript, typescript, Vue.js and HTML/CSS/Tailwind CSS to create and deliver outstanding user experiences.

PROFESSIONAL SKILLS

- Proficient in HTML5, CSS3 (Bootstrap and Tailwind css), JavaScript and typescript.
- Extensive experience with various frontend frameworks such as Vue.js/React.js.
- Experience with Vuetify and Quasar UI component libraries, leveraging their extensive pre-built components and styling options and enhancing the user interface.
- Ability to integrate Backend APIs and work with JSON data for dynamic content rendering.
- Experience in integrating 3rd party libraries and plugins to enhance frontend functionality.
- Adept at using version control systems like Git for collaborative development, enabling seamless code management and teamwork.
- Proficient in working with Linux environments, providing flexibility and customization.
- Familiarity with Webpack for bundling and optimizing frontend assets, ensuring performance
- Well-versed in Agile methodologies, particularly Scrum, for efficient project management and collaboration, like Jira.
- Knowledge of Web3 and DApps (Decentralized Applications), enabling the development of blockchain-based applications and smart contracts.
- Proficient in deploying projects on domains/servers, ensuring smooth and reliable delivery of web applications to end-users.

PROFESSIONAL EXPERIENCE

Sr. Frontend Developer (2 Years)

[Darvis](#) - July 2021 – June 2023

DARVIS focused on Computer Vision and AI, creating a new technology solution to help healthcare and logistics companies is located in Nashville, TN, USA.

As a front-end developer, I worked with a team on their AI Based Product's Dashboard using Vue2 which is now being used by “**United States Postal Service (USPS)**” for inventory tracking. Other clients are Home Depot, Saudi Post, and Asklepios.

Core Responsibilities

- **User Interfaces:** Translating design mockups and wireframes into functional and responsive user interfaces using HTML and CSS, Bootstrap and Tailwind css.
- **Component libraries:** Using Vue.js Component libraries like Quasar and Vuetify for reusable and customizable UI components by writing efficient, clean, and modular code.
- **Framework:** Understanding and implementing state management. This often involves using Vuex, to manage the application's state in a centralized way.
- **Backend Integration:** Collaborating with backend developers to integrate frontend components with server-side APIs. This involves making HTTP requests using Axios, Axios-Interceptors for request and response handling and processing data to display in the UI.
- **Test Cases:** Writing and executing unit tests to ensure the reliability and stability of the code.
- **Version Controlling:** Managing code repositories on GitHub and deploying applications on Linux-based systems while adhering to coding standards and best practices.
- **Documenting:** Documenting your code, design decisions, and any other relevant information to facilitate knowledge sharing and future maintenance.

Frontend Development (3.5 Years)

[Block360](#) - January 2018 – July 2021

Block360 is a software development company which helps businesses in the domain of blockchain. As a frontend developer there, I used to build Web Applications, Web3 Dapps and landing Pages.

Core Responsibilities

- **Requirements Breaking:** Understood the requirements of Customers and broke it down into UI, ensuring user experience was smooth.
- **UI Development:** Used HTML5 and CSS3(bootstrap & tailwind), including Sass or Less for developing responsiveness, organized and refactored legacy code.
- **Framework:** Acquired familiarity with the Vue.js ecosystem, including Vue CLI, Vuex, Vue Router, and Nuxt.js.
- **API'S Integration:** Experienced with both consuming and designing RESTful APIs.
- **Web3 Integration:** Implemented and integrated Web3.js or other appropriate libraries to enable communication with blockchain networks (Ethereum, Binance Smart Chain, etc.).
- **Wallet Integration:** Worked on wallet integration to enable seamless interactions with user's crypto wallets. This includes connecting with various wallet providers like MetaMask, Trust Wallet, Coinbase Wallet, and others.
- **Smart Contract Interaction:** Used to Develop front-end solutions to interact with smart contracts deployed on the blockchain. This involves reading and writing data to the blockchain and triggering smart contract functions.

EDUCATION

- **2014 to 2018** - Bachelor's in Electrical Telecommunications Engineering
Comsats University Islamabad - Pakistan
- **2012 to 2014** - F.Sc pre Engineering
Punjab College Sialkot - Pakistan

LANGUAGES

- English **Business Fluent**
- Urdu **Native**
- Punjabi **Native**
